Avisos de Viena

Viennese Siglo de Oro Journal

Dear reader,

Avisos de Viena offers new perspectives on Spanish cultural history. Our team provides short articles which deal with the 16th and 17th century and might interest both academic readers and a wider public.

All our authors are connected to research on
the playwright Calderón,
sound and meaning in Baroque literature,
pregnancy, childbirth and earliest infancy.

Avisos de Viena aims to quickly disseminate the findings emerging from these scholarly endeavours. The papers gathered for this pilot will give you an idea about current topics, sources and research questions.

We would be happy if they triggered lively debates!
